

EMPOWERING KOROGOSHO TEACHERS

OSAGIEDES UPDATE
JUNE 2024

Studies have shown that teachers spend more time with students during their school years, which underscores their impact on their student's lives in the long term.

We relaunched the Kenya version of the Study with Success (SwS) program a few weeks ago. The SwS seminar is a transformative tool designed to ignite a passion for learning and equip students with the skills they need to excel academically and be productive in many areas.

In the short video report (see attached), we share testimonies of how the training helped 12 teachers from the Korogosho area of Nairobi, Kenya.

- Pray for open doors to empower more teachers.
- Pray for wisdom and grace for the teachers to do the work of equipping students for excellence.
