

# JUNE MINISTRY UPDATES

FROM THE OSAGIEDES, JUNE 2025

**The month of June has been very eventful, so many opportunities to minister to the people that God has placed around us.**

## COUPLES MINISTRY

When we first came to Nairobi, we met with our Pastor, and we shared how we had desired to begin a Family ministry in the church (considering it was a small church plant). The Lord opened that door for ministry this June, and it has been eventful as we have met with four (4) couples each week, to share God's principles about how communication in marriage should go. The excitement of what God is doing in our midst has made them become recruiters, inviting other couples to join us.

## CROSSROADS

God has blessed our church with rich programs that cater to the development of people at various stages of their lives. One of those programs is called Crossroads, this ministry is for 12- and 13-year-olds who are growing physically, emotionally, psychologically, spiritually, and in this season of their lives, they confront numerous voices daily, including those of the media, parents, teachers, and peers.

At Crossroads, we speak into these many areas of their lives and share with them God's perspective in their daily decisions. Considering there are very few hands, Cinci volunteered alongside another gentleman to lead these pre-teens and teens in growing in their relationship with God, and it has been a fantastic time. One of the children had this to say about the classes they have been taken through:

*"It is interesting, it opens my mind to God, it helps me learn about Him in fun ways."*

## PRAY

We are truly grateful to God for the opportunities he has given us to serve especially in our church, please pray that:

- The principles these couples are learning from God's word will be true in their lives and will be bring transformation to their homes.
- That the children will imbibe God's word in their hearts and it will produce godly living.
- That the Lord will take care of all our needs.

In Christ,

*Cinci & Moses*
